DESCRIPTION

The fuse module is designed for power distribution in the power supply units of EN54 series (RED POWER). It contains two power inputs, IN1 and IN2, connecting to the power supply and eight independently secured outputs AUX1÷AUX8. The IN1 input supplies power to the AUX1...AUX4 outputs, while the IN2 input supplies power to the AUX5...AUX8 outputs. Each AUX output has short-circuit protection (SCP) in form of F 0,5A glass fuses. Outputs condition is indicated by L1÷L8 LEDs. Fuse activation is indicated by: turning off the corresponding LED: L1 for AUX1, L2 for AUX2 etc., technical output - OC (open collector) and relay type and PSU red LED. PSU technical output can be used for remote control of the parameters, e.g. external optical indication.
