CODE: **\$54-B17** v.1.0/I

TYPE: S54-B17 5-port switch for 4 IP cameras with enclosure and battery backup

CE

#### Features:

- Uninterruptible power supply of 4 IP cameras (48VDC)
- 5 10/100 Mb/s ports
- 4 PoE ports (data transfer and power supply)
- 15,4W for each PoE port, supports devices complaint with the IEEE802.3af standard
- Supports auto-learning and auto-aging of MAC addresses (1K size)
- Metal enclosure color white RAL 9003 with battery space for a 12V/17Ah battery
- warranty 2 year from the production date

#### **DESCRIPTION**

The S54-B17 is dedicated for uninterruptible power supply of 4 IP cameras (48VDC power supply).

The main elements of this system include:

- -5 port PoE switch
- 13,8V buffer power supply with a single 1 x 17Ah / 12V battery
- -A converter (DC/DC48125) increasing the voltage to 48VDC (supply of the PoE switch)

In case of power decay, a battery back-up is activated immediately.

Automatic detection of any devices powered in the PoE standard is enabled at the 1-4 ports of the switch. The UPLINK port is used for connection of another network device e.g. recorder. The LEDs at the front panel indicate the operation status.

The switch is housed in a metal enclosure (color RAL 9003) which can accommodate a 1x17Ah/12V battery. The enclosure features a micro switch tamper indicating door opening (front panel).

The S54-B17 is fitted with two LEDs on the front panel (red LED – indicates 230VAC power supply of the PSU, green LED indicates the presence of DC voltage).

The PoE technology ensures a network connection and reduces installation costs by eliminating the need to supply a separate power cable for each device. This method allows supplying other network devices, such as IP phone, wireless access point or router.

# S54-B17 5-port switch for 4 IP cameras with enclosure and battery backup

## PARAMETERS OF THE SWITCH

Ports	5 10/100Mb/s ports (4 x PoE + 1 x UPLINK)
	with connection speed auto-negotiation and MDI/MDIX Auto Cross)
PoE power supply	IEEE 802.3af (1÷4 ports), 48V DC / 15,4W at each port *
Protocols, Standards	IEEE802.3, 802.3u, 802.3x CSMA/CD, TCP/IP
Forwarding rate	10BASE-T: 14880pps/port
	100BASE-TX: 148800pps/port
Bandwidth	1,6Gbps
Transmission method	Store-and-Forward
Optical indication of operation	Switch power supply;
	Link/Act;
	PoE Status

<sup>\*</sup> The given value of 15,4W per port is the maximum value. The total power consumption should not exceed 48W when all PoE ports are being used.

## **ELECTRICAL PARAMETERS**

Battery circuit protection SCP and reverse polarity connection melting fuse	PSU current consumption	100mA
reverse polarity connection	Battery charge current	0,5A max. @1x17Ah (+/-5%)
reverse polarity connection		melting fuse
Deep discharge hattery protection LIVP	reverse polarity connection	morally race
Deep discharge battery protection over 1 0-9,5v (± 5%) – disconnect or connection battery	Deep discharge battery protection UVP	U<9,5V (± 5%) – disconnect of connection battery
Sabotage protection: - TAMPER output indicating enclosure opening - microswitch, NC contacts (enclosure closed), 0,5A@50V DC (max.)	- TAMPER output indicating enclosure	

## **MECHANICAL PARAMETERS**

Enclosure dimensions	400 x 350 x 90+8 [mm (WxHxD)
Fitting battery	17Ah/12V (SLA) max.
	185 x 170 x 80mm (WxHxD) max
	H $D$ $W$
Gross/Net weight	3,8 / 4,1kg
Enclosure	Steel plate, DC01 1,0mm color white RAL 9003
Closing	Cheese head screw x 2 (at the front), (lock assembly possible)
Connectors	Power supply of the cameras: RJ45 socket
	Outputs: Φ 0,63-2,50 (AWG 22-10), battery output BAT: 6,3F-2,5
	TAMPER output: wires
Notes	The enclosure does not touch the assembly surface so that cables can
110163	be led.
